

GENERAL INSTALLATION INSTRUCTIONS

TOWEL BAR, DOUBLE TOWEL BAR, TISSUE HOLDER (TRADITIONAL)

PREPARATION

Tools Required for Assembly: (Not included)

- Pencil
- Electrical drill with 5/16 in. drill bit
- Hammer
- Philips head screwdriver

CAUTION: Drywall anchors are for drywalls only. Use tile anchors for tile surfaces. (Not included)

INSTALLATION INSTRUCTIONS

1. Hold assembled item up against desired position on wall, and outline the back plates of end pieces with a pencil. (Fig. 1)
Use a measuring tape and a level for accuracy.
2. Position a mounting bracket (C) in the center of outlined back plate. Use a pencil to mark positioning of the screw holes. (Fig. 2)
3. Drill 5/16 in. pilot holes into the wall where the drywall anchors (E) will be inserted.
4. Pinch drywall anchors (E) two wings together (Fig. 3), and insert it into the hole horizontally. Tap flush with the wall using a hammer.
5. Insert the red push pin (F) into the drywall anchors (E) until the wings pop open. (Fig. 4) Then remove the pin. Do not tap the red push pin with hammer.
6. Place the mounting bracket (C) over the drywall anchors (E). Insert mounting screws (G) through the bracket and anchors, and then tighten firmly with Philips head screwdriver. (Fig. 5)
7. Secure the end piece (A) with Allen wrench (H) and set screw (D). (Fig. 6)
8. Repeat 2-6 for the other end piece, and insert the bar tubing into the end pieces. Secure the other end piece with Allen wrench and set screw.

CARE AND MAINTENANCE

To maintain the beautiful luster finish, please use soft damp cloths when cleaning and never use any cleaning solvents.
